

PRACTICE PROGRAM IN JAVA

NAME: Dhanusha D

CODE: CSA0927

REG NO: 192424189

DATE: 04-08-2026

SUBJECT: Programming in Java

Q1 Student :

Write a program to enter the mark of a student in four subjects. Then calculate the total and aggregate. Display the grade obtained by the student, if student scores an aggregate greater than 75% then grade is distinction

CODE & OUTPUT:

Your Code

```
1 import java.util.Scanner;
2 public class StudentGrade
3 {
4     public static void main(String[] args)
5     {
6         int[] marks={95,97,96,98};
7         int total=0;
8         double aggregate;
9         for(int i=0;i<marks.length;i++)
10        {
11            total=total+marks[i];
12        }
13        aggregate=(total/400.0)*100;
14        System.out.println("Total="+total);
15        System.out.println("Aggregate="+aggregate+"%");
16        if(aggregate>75)
17        {
18            System.out.println("Grade: Distinction");
19        }
20        else
21        {
22            System.out.println("grade: No Distinction");
23        }
24    }
25 }
```

Input

stdin input

Output

```
Total=386
Aggregate=96.5%
Grade: Distinction
```

Q2 Atm

write a program to print the total amount available in the atm machine with the conditions applied total denominations are 2000, 500, 200,100, get the denomination priority from the user and the total number of notes from the user to display the total available balance to the user

CODE & OUTPUT:

Your Code

```
1 import java.util.Scanner;
2 public class ATM
3 {
4     public static void main(String[]args)
5     {
6         int [] denomination={2000,500,200,100};
7         int [] notes={5,10,15,20};
8         int totalBalance=0;
9         System.out.println("Denomination\tnotes\tAmount");
10        for(int i=0;i<denomination.length;i++)
11        {
12            int amount=denomination[i]*notes[i];
13            totalBalance=totalBalance+amount;
14            System.out.println(denomination[i]+"\\t\\t"+notes[i]+"\\t"+amount);
15        }
16        System.out.println("\\n Total Available Balance= Rs"+totalBalance);
17    }
18 }
```

Input

stdin input

Output

Denomination	notes	Amount
2000	5	10000
500	10	5000
200	15	3000
100	20	2000

Q3 Tax

Write a program to calculate tax given following condition :

If income is less than or equal to 150000 then to tax

If taxable income is 150001 – 300000 the charge 10% tax

If taxable income is 300001 – 500000 the charge 20% tax

If taxable income is above 500001 the charge 30% tax

CODE & OUTPUT:

```
1 import java.util.Scanner;
2 public class TaxCalculation
3 {
4     public static void main(String[] args)
5     {
6         int [] income={120000,250000,400000,600000};
7         double tax;
8         for(int i=0;i<income.length;i++)
9         {
10             if(income[i]<=150000)
11             {
12                 tax=0;
13             }
14             else if(income[i]<=300000)
15             {
16                 tax=income[i]*0.10;
17             }
18             else if(income[i]<=500000)
19             {
20                 tax=income[i]*0.20;
21             }
22             else
23             {
24                 tax=income[i]*0.30;
25             }
26             System.out.println("Income="+income[i]);
27             System.out.println("Tax="+tax);
28             System.out.println();
29         }
```

stdin input

Output

```
Income=120000
Tax=0.0
```

```
Income=250000
Tax=25000.0
```
